Test Case 1

Version 3 September 20, 2024

dpwaiaa@gmail.com

Test Case 1: ONERA OAT15A Geometry & Data

 Geometry is available here: (it is very strongly desired to use the provided IGES file in the ONERA OAT15A zip file and not the raw coordinates)

https://aiaa-dpw.larc.nasa.gov/geometry.html

- Committee-supplied RANS grids are available here
 https://aiaa-dpw.larc.nasa.gov/grids.html
- Experimental data are available here
 https://aiaa-dpw.larc.nasa.gov/experiment.html

Test Case 1: Workshop-Wide Validation

- Validation of steady CFD analysis, required
- Users are encouraged to employ best practices

Settings

- Steady CFD (e.g., RANS)
- Prefer some version of SA, multiple turbulence models can be submitted
- Use periodic boundary conditions for sidewall boundary conditions

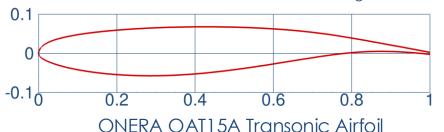

Grids

- Six-member grid family; four are required, six are desirable
- Encourage use of committee-supplied grids; user-generated grids are acceptable
- Three committee-supplied once-cell-wide grid topologies are provided

Conditions

- Mach 0.73, Re_c=3m (based on chord length), T_{static}=271 K (487.8 R)
- Alpha: 1.36, 1.50, 2.50, 3.00, 3.10
- Experimental conditions (for reference): P_{total}=102.4 kPa; P_{static}=71.8 kPa

Jaquin, et al. "Experimental Study of Shock Oscillation over a Transonic Supercritical Profiles." AIAA Journal, Vol. 47, No. 9, 2009. Pages 1985-1994.

Test Case 1: Data Submission

Please follow these instructions

https://aiaa-dpw.larc.nasa.gov/postprocessing.html

Required data

- Forces and Moments
 DPW8-AePW4 ForceMoment v5.dat
- Surface cuts

 DPW8-AePW4_SectionalCuts_v5.dat
 Use sectionalCutter-v2.mcr
- Convergence data
 DPW8-AePW4_Convergence_v5.dat
- Contour plots
 Use airfoilImages-v2.mcr
