Welcome Submission Review

View Submissions

View Submissions

- All submissions must be made electronically via this submission site, as follows:
- Click "Create New Submission" from the left vertical menu. To complete a submission left in draft, scroll down to the Drafts table at the bottom of this page. Choose "Edit Draft" from the dropdown box under the "Take Action" column.
 - There are 4 submission elements, all of which must be completed (denoted by a green check mark beside the step) before you can **complete your submission at step 5--by clicking the "Submit" button**. Successful submissions will be confirmed by email. Detailed submission topic information is available at the [Call for Papers \(CFP\)](#).
 - You may revise your submission through the abstract deadline. Return your submission to draft, make the needed changes, and resubmit at step 5.
- Submission Requirements:**
- Each submission must be formatted as extended abstract or draft manuscript with a minimum of 1000 words.
 - The submission must include sufficient detail to demonstrate the purpose of the paper, the technical foundation for the topics to be discussed, any preliminary results to date, and the expected results of the final paper, including key figures, equations, tables, and references, as appropriate. Sufficient information must be included in the submission to convince the Forum organizers and reviewers that the author(s) will have a strong likelihood of completing the final paper by the final paper submission deadline.

Late submission access is granted by Technical Discipline Chairs at their discretion.

If you have been granted late submission access, please limit your submission to the requested technical topic. The deadline below is the general submission deadline. Your individual extension applies to you only and is not displayed here.

Do not make any changes to other completed submissions. Review has already begun and this could impede the process. If you need to edit a previously completed submission, contact the appropriate technical chair with your request.

Submissions

TAKE ACTION	TITLE	CONTROL ID	SUBMITTED	TYPE
Select ...	GPU-Accelerated Mesh Curving in FUN3D	4561025	May 15, 2026 11:41 AM EDT	Abstract Submission

Step 4

- Email Brent and Bret
- They will coordinate with the Technical Discipline Chairs to re-open submission for you
- Must be done by June 19
- Title and author can be changed
- If export control is an issue, we can submit a filler abstract and change you to the author later

Step 5

- Upload the abstract
- The AIAA website has static text that says the abstract window is closed... ignore that message
- Send the Control ID to Brent and Bret
